Dear Customer

Die Grinders

Notification of Rated Rotation Speed to change

NPK have changed the rated rotation speed of the following die grinders, as a result of reviewing our production process. To reflect this change, the model names were altered.

IMPORTANTLY, please inform this change to your clients and users, especially to those who have ever purchased or used these grinders. The users may need to switch their inserted tools such as mounted points and/or rotary burrs to another one. Make sure to check the maximum speed (rpm) of the mounted points or rotary burrs is equal to or above the rated speed (rpm) shown below.

- 1) No change in other specifications.
- 2) Every component part of the new tools is interchangeable with the previous one.
- 3) NPK are switching to the new tools after the old tools are all used up.
